Commanding an Air Force Squadron Timothy T. Timmons 1993 Obviously directed at Air Force readers, Colonel Timmons's book - because of its aphoristic, anecdotal, concrete approach - will speak to readers in other services and in many civilian organizations and institutions as well. Shelves in the nation's bookstores today are groaning under the weight of "how-to" leadership books purporting to reveal the secrets of how to succeed in one career or another. Most do not last. Only a few stand the test of time; this promises to be one of them. Lieutenant General Bradley C. Hosmer, United States Air Force Superintendent, United States Air Force Academy

Space Capstone Publication Spacepower Us Government United States Space Force 2020-08-11 This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space

operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

I'm a Teacher Too... Brent Barry 2005-03 All too often in our great nation's history there seems to be some sort of a separation between the great expectations of the American Education system, the greatness of our masses, and the awesomeness of the Department of Defense. Some have said, "No American Educator wants a soldier, sailor or airman telling them how to teach in the average American classroom."

Hey, Tiger—You Need to Move Your Mark Back Steve Scott 2021-06-01 Experience the thrill, twenty-five years later, of Steve Scott's epic finals match against Tiger Woods in the 1996 United States Amateur Championship! In August of '96, Steve Scott went head to head against Tiger Woods at Pumpkin Ridge Golf Club in the finals of the US Amateur Championship. Five thousand three hundred forty-five players whittled down to two. Scott found himself a surprising 5-up after the first 18, but at hole 35 Tiger squared the grueling match with an improbable 40-foot birdie putt. With the result coming down to the last hole, the difference in the outcome actually came earlier, when Scott reminded Woods to move his mark back to its rightful place on hole 34. Had Scott not done the morally correct thing, Tiger would have been penalized and, in turn, not have won three straight U.S. Amateur Championships (something not even the great Jack Nicklaus or legendary Bobby Jones had done), forever changing the course of Tiger's career and golf history. In Hey, Tiger—You Need to Move Your Mark Back, Scott teams up with esteemed storyteller Tripp Bowden to explain, twenty-five years later, what led to that life-changing moment and to describe, in his own words, the exhilaration of that '96 U. S. Amateur Championship and how it ultimately changed golf history and the two competitors' lives. Forever. Hey Tiger—You Need to Move Your Mark Back is a story for the ages for golf fans looking for an unlikely new perspective on the greatest game in the world.
