Do What Feels Good Hannah Bronfman 2019-01-08 "Hannah Bronfman is challenging us all to rethink our default standards of beauty and definitions of 'healthy'—and I, for one, couldn't be happier to hear this from another woman of color in the wellness community. Do What Feels Good is a practical, inspirational, and beautiful guidebook to feeling good in your own skin." --Gabrielle Union, actress and bestselling author of We're Going to Need More Wine As a food lover, beauty product addict, exercise junkie, and wellness entrepreneur, Hannah Bronfman practically radiates confidence and health. But she'll be the first one to admit that the road to wellness and self-acceptance hasn't been easy. As a woman of color who grew up watching a close family member struggle with an eating disorder, Hannah's had to forge her own path and create her own standards of beauty. And what she's learned is this: Healthy is beautiful. And healthy should feel good. In Do What Feels Good, Hannah offers real talk about getting in touch with your body's needs, baring her soul and sharing her story along the way. Hannah provides insight on everything from gut health to nutrition to fitness to skincare, sharing insight from top experts on how to understand your body's unique chemistry so that you can fuel it with more of the things that feel good and less of the things that don't. And since delicious food is one of the things that makes everyone feel good, Hannah shares more than 50 of her favorite recipes for healthy hedonism (desserts and cocktails included!). Enlightening, empowering, and educational, this is an approach to wellness that is holistic, hedonistic, and real. Because self-care should not feel self-punishing, and every body deserves to feel good.

Brain-Powered Weight Loss Eliza Kingsford 2025-01-10 Losing weight and successfully maintaining it over the long term is not as much about what you put in your stomach; it's more about what's happening in the brain. In Brain-Powered Weight Loss, psychotherapist and weight management expert Eliza Kingsford shows that more than 90 percent of people who go on diet programs (even healthy ones) fail or eventually regain because they have a dysfunctional relationship with food. Changing this relationship by changing the way you think about and behave around food is what it takes to permanently achieve weight-loss success. Kingsford's 11-step first-of-its-kind program enlists dozens of mind-altering and behavior-changing exercises and techniques that shows you how to: - Identify and reverse the conscious and unconscious thinking errors and food triggers that lead to the behaviors that drive our food decisions. - Let go of the mindset of going on or off a diet in favor of a conscious quest to pursue a lifestyle of healthy eating and everyday activity — one that can last forever. - Successfully use what Kingsford calls "dealing skills" to outsmart high-risk situations, tame stressful times, and prevent an eating "slip" from leading to a setback or all-out binge. - Find out if you have what emerging research shows is an addiction to certain high-fat and sugar-added, processed foods that can be as powerful as addiction to cigarettes and narcotics. - Design a personal healthy eating program built on Kingsford's 10 Principles of Healthy Eating. **The 8-Week Blood Sugar Diet Recipe Book** Dr Clare Bailey 2016-09-15 'The diet that could save your life.' - The Times 'A brilliant book if you have type 2 diabetes or you don't want to get it.' - Jeremy Vine, BBC Radio 2 **AS SEEN ON CHANNEL 4** Dr Michael Mosley's No 1 bestselling 8-week Blood Sugar Diet revealed a game-changing approach to weight loss that not only lowers blood sugar levels, but can also reverse and prevent type 2 diabetes. In this fabulous companion cookbook, Dr Clare Bailey, GP and wife of Michael Mosely, has teamed up with renowned nutritionist Dr Sarah Schenker to create a collection of low-cal, low-carb recipes, all expertly balanced and easy to make. Attracting Science and Mathematics Ph.D.s to Secondary School Education Center for Education 2000-09-16 The National Research Council conducted a study to identify a set of incentives that state governments and local school districts can use to attract Ph.D. scientists and mathematicians to secondary school teaching positions. This project investigated the career ambitions of Ph.D.s in the physical and life sciences through focus groups and a national survey to determine the kinds of work conditions and compensation packages that would induce them to take positions teaching physics, chemistry, biology, and various electives in public high schools or positions developing secondary school science and mathematics curricula. The study conducted interviews with Ph.D.s who are already teaching in secondary schools to ascertain information from their experiences, with local school district administrators to assess what they are realistically willing to offer Ph.D. scientists to attract them, and with higher education administrators to explore programmatic changes they would need to institute to provide Ph.D.s with skills tailored to secondary school teaching. These investigations led to this report which describes the incentives local school districts could use in establishing pilot programs in this area.
