The Maltreatment of Children S.M. Smith 2012-12-06 The maltreatment of children is an issue that has always been with us and civilized societies provide a range of services both social and medical to care for the children and families afflicted. In recent years, greater attention has been drawn to the medical aspects by competent authorities in the fields of forensic medicine, forensic psychiatry, epidemiological psychiatry, child psychiatry and family psychiatry; as well as the social aspects by those child welfare and child care agencies who have the difficult and distasteful task of removing children, with the help of the courts, from parents who can abuse them and are not able to care for them adequately. A multitude of social agencies, whose range of activities involve both the care and, where possible, the social betterment of afflicted families are now involved. Not least in importance is an increase in our global knowledge to help in the prevention or better treatment of these problems. This means more information on familial and genetic factors in human central nervous system development in its broadest sense. This would include how the central nervous system originates, mediates and controls the build up, speed of development and impulsive release, mastery and direction of aggressive drives and impulses. Very little is so far known about these factors.

Equal Shares Dennis Lewycky 1999 Equal Shares tells a fascinating story--the history of a group of dynamic tapestry workers who changed the economic life of their community. The authors examine a key community-based cooperative in Botswana that was launched in the early 1970s, and is hailed as a model for development and social change. With little formal education, virtually no job experience, still working their own agricultural lands, and many as single mothers, the co-op workers have maintained their business for over twenty-five years. Equal Shares is written in different voices, and tells the story of the defining moments in the lives of the Oodi Weavers. As the workers weave their village stories into the tapestries, the book weaves a story that depicts their evolving collective experience. It's a model of community action. Inspiring reading for all those fighting to take control of their economic lives.
