Running Time T.J. MacGregor 2016-05-08 SHE'S RUNNING OUT OF OPTIONS Nora McKee knows something she shouldn't—something that could get her killed. A ruthless shad organization has been using top-secret technology make its adversaries "disappear." Now the device in Nora's hands—which puts her right in the line of fire. But hiding out is not an option, not with so much at stake. AND STRAIGHT INTO A NIGHTMARE The first step is a daring rescue mission that quickly becomes a desperate race for survival. In a town run by corruption and fear, trusting the wrong person can be deadly. And as Nora and her brilliant partner, Alex Kincaid, race to uncover a conspiracy that goes deep

than they ever imagined, a powerful, unseen enemy edging closer and closer, determined to reclaim what's theirs—and silence Nora and Alex forever.

Machine Learning: ECML 2005 João Gama 2005-11-15 The European Conference on Machine Learning (ECML) and the European Conference on Principles and Practice of Knowledge Discovery in Databases (PKDD) were jointly organized this year for the ?fth time in a row, after some years of mutual independence before. After Freiburg (2001), Helsinki (2002), Cavtat (2003) and Pisa (2004), Porto received the 16th edition of ECML and the 9th PKDD in October 3–7. Having the two conferences together seems to be working well: 585 di?erent paper submissions were received for both events, which maintains the high s- mission standard of last year. Of these, 335 were submitted to ECML only, 220 to PKDD only and 30 to both. Such a high volume of scienti?c work required a tremendous e?ort from Area Chairs, Program Committee members and some additional reviewers. On average, PC members had 10 papers to evaluate, and Area Chairs had 25 papers to decide upon. We managed to have 3 highly qua-?edindependentreviewsperpaper(withveryfewexceptions)andoneadditional overall input from one of the Area Chairs. After the authors' responses and the online discussions for many of the papers, we arrived at the ?nal selection of 40 regular papers for ECML and 35 for PKDD. Besides these, 32 others were accepted as short papers for ECML and 35 for PKDD. This represents a joint acceptance rate of around 13% for regular papers and 25% overall. We thank all involved for all the e?ort with reviewing and selection of papers.

The Game and Rules of the Game Neil Strauss 2011-09-29 The Game recounts the incredible adventures of an everyday man who transforms himself from a shy, awkward writer into the quick-witted, smooth-talking Style, a character irresistible to women. But just when life is better than he could have ever dreamed (he uses his techniques on Britney Spears, receives life coaching from Tom Cruise, moves into a mansion with Courtney Love and is officially voted the World's Number One Pickup Artist) he falls head over heels for a woman who can beat him at his own game. If you want to play The Game you need to know The Rules. This book is not a story. It is a how-to book. This Stylelife Challenge is not meant to be read. It is meant to be performed. Whatever experience level you have, whatever strengths and weaknesses you may have, whether

you're a virgin or a Don Juan, the stage has been set for you to perform at your highest capacity. The Stylelife Challenge is a simple, easy-to-follow guide to the basics of approaching and attracting women. The Challenge is simply what works best and fastest. Neil Strauss spent four years gathering this knowledge, living it and sharing it. He's tested the specific material in this book on over 13,000 men of varying ages, nationalities and backgrounds. Part practical application and part sequel, this is the further adventures of Style and his game techniques. The result: A month-long workout program for your social, attraction, dating and seduction skills.

Foundations of Intelligent Systems Floriana Esposito 2015-11-02 This book constitutes the refereed proceedings of the 22nd International Symposium on Methodologies for Intelligent Systems, ISMIS 2015, held in Lyon, France, in October 2015. The 31 revised full papers presented together with 18 short papers were carefully reviewed and selected from 67 submissions. The papers are organized in topical sections on data mining methods; databases, information retrieval, recommender systems; machine learning; knowledge representation, semantic web; emotion recognition, music information retrieval; network analysis, multi-agent systems; applications; planning, classification; and textual data analysis and mining.

The Odyssey of a New Religion Phillip Charles Lucas 1995-02-22 "... solid scholarship.... [It] will not only serve as a model for those studying the New Religious Movements of the late twentieth century, but will offer help to mainline and other religious institutions who are struggling with problems of identity and change in our complex society today." -- Church History "... a thoroughly enjoyable book that would fit well into a graduate readings seminar on new religious movements....The book deserves a wide reading." -- Nova Religio "Lucas's study provides a model of how best to combine the methodologies and analyses of the history of religions and sociology. He has provided the groundwork for continued tracking of developments in this new religious movement for comparative purposes." -- Journal of the American Academy of Religion "... a carefully researched and well-written history of one of the important new religious movements to appear in the United States during the 1960s... the volume can be heartily recommended to all students of American religion." -- American Historical Review "Lucas has written one of the best informed studies of the evolution of a metaphysical cult into mainline eastern orthodoxy."Â -- The Reader's Review "This is an important book for libraries with holdings in American religion." -- Choice "... a fascinating

narrative... a rich feast for the investigator of the subculture of esoteric religion... " -- American Studies International "... especially welcome. It offers an in-depth, meticulously documented history of a church, the Holy Order of MANS, that arose from the Christian esoteric mystery tradition and then metamorphosed into a traditionalist Orthodox Christian sect. This unlikely tale has more twists and turns than a whodunit... this volume is that rarest of finds: an academic book that is a delight to read." -- Gnosis Magazine Traces the journey of a new religious movement from its start as a monastic-style New Age order to its transformation into the more conventional Christ the Savior Brotherhood, an Eastern Orthodox sect. A remarkable story of social and spiritual change in contemporary America.

Forbidden Archeology's Impact Michael A. Cremo 1998-01-01 Examines the impact of the author's controversial 1993 book Forbidden Archaeology on the scientific community.

The Handbook of COURAGE Apor, Balázs 2018-11-27 The COURAGE Handbook ushers its reader into the world of the compellingly rich heritage of cultural opposition in Eastern Europe. It is intended primarily to further a subtle understanding of the complex and multifaceted nature of cultural opposition and its legacy from the perspective of the various collections held in public institutions or by private individuals across the region. Through its focus on material heritage, the handbook provides new perspectives on the history of dissent and cultural non-conformism in the former socialist countries of Central, Eastern, and Southeastern Europe. The volume is comprised of contributions by over 60 authors from a range of different academic and national backgrounds who share their insights into the topic. It offers focused discussions from comparative and transnational perspectives of the key themes and prevailing forms of opposition in the region, including non-conformist art, youth sub-cultures, intellectual dissent, religious groups, underground rock, avantgarde theater, exile, traditionalism, ethnic revivalism, censorship, and surveillance. The handbook provides its reader with a concise synthesis of the existing scholarship and suggests new avenues for further research.

Mind Control Language Patterns Dantalion Jones 2008-08 Mind Control Language Patterns are spoken phrases that can act as ""triggers"" to the people who hear them. In short, they influence and control how we

respond and cause us to be influenced to do things without our knowing. These language patterns are not fantasies but are based on documented uses that come from, psychology, hypnosis, Neuro Linguistic Programming and studies of human behavior. Mind Control Language Patterns can be used to help and hurt. One can use Mind Control Language Patterns to create positive and lasting change in people, as well as feelings of trust, love and affections. They can also be used to induce amnesia, fear, insecurity and doubt. These types of patterns are what we call ""dark"" pattern.

Print Culture at the Crossroads Elizabeth Dillenburg 2021-08-30 This book investigates the importance of printing in early-modern Central Europe, revealing a complicated web of connections linking printers and scholars, Jews and Christians, from the Baltic to the Adriatic.

Serious Reflections During the Life and Surprising Adventures of Robinson Crusoe with his Vision of the Angelick World Daniel Defoe Defoe 2022-04-22 Serious Reflections During the Life and Surprising Adventures of Robinson Crusoe with his Vision of the Angelick World, first published in 1720 and considered a sequel to The Farther Adventures of Robinson Crusoe, is a collection of essays written in the voice of the Crusoe character. Expressing Defoe's thoughts about many moral questions of the day, the narrator takes up isolation, poverty, religious liberty, and

epistemology. Defoe also used this volume to revive his interest in poetry, not the satiric poetry of the early eighteenth century, but the more inspirational verse that appeared in some of his later works. Serious Reflections also includes an imaginative flight in which Crusoe wanders among the planets, a return to the moon voyage impulse of Defoe's 1705 work The Consolidator. Illuminating the ideas and philosophy of this most influential of English novelists, it is invaluable for any student of the period.

Women and Romance Susan Ostrov Weisser 2001-07 Romantic love has challenged and vexed feminist thought from its origins. Judging from the shelves of books advising women on love problems, there seems to be an ongoing difficulty in maintaining equality in romantic relationships. Does romance weaken or empower women? Why do women seem overwhelmingly attracted to romantic love in spite of raised consciousness in other areas of life that is a legacy of feminism? Have women always been seen as the sex which most seeks love and is best suited for love? These are some of the questions Women and Romance: A Reader seeks to address in bringing together a collection of texts specifically focused on the subject of women's conflicted but powerful urge to experience the pleasure and endure the pain of romantic love. The first anthology of its kind, Women and Romance includes historical as well as contemporary selections, personal letters as well as theoretical essays, and social science perspectives as well as literary criticism of the novel and the popular mass-market romance. Wiesser lays out in systematic order for the first time the varying viewpoints and conflicted history of feminist views on romance, from Mary Wollstonecraft and Emma Goldman to Germaine Greer and Lillian Faderman. Introductions to each entry and section clarify the emerging themes of each era and of separate disciplines, while representing the views of traditionalists and anti-romance second-wave feminists alike. Contributors include: Charlotte Bronte, Barbara Bross, Eliza Southgate Bowne, Rita Mae Brown, Andreas Capellanus, Patricia Hill Collins, Simone de Beauvoir, Christine Delphy, Emily Dickinson, George Eliot, Lillian Faderman, Shulamith Firestone, Moderata Fonte, Mary Gaitskill, Charlotte Perkins Gilman, Emma Goldman, Vivian Gornick, Germaine Greer, Lynne Harne, bell hooks, Karen Horney, Carolyn Heilbrun, Audre Lorde, Tania Modleski, Gloria Naylor, Mary Poovey, Janice Radway, William Robinson, Jean-Jacques Rousseau, Jane Rule, Barbara Ryan, Ann Snitow, Elizabeth Cady Stanton, Gloria Steinem, Mary Wollstonecraft, Victoria Woodhull, Virginia Woolf.

Model Driven Engineering Languages and Systems Dorina C. Petriu 2010-09-21 The MODELS series of conferences is the premier venue for the

exchange of - novative technical ideas and experiences focusing on a very important new te- nical discipline: model-driven software and systems engineering. The expansion ofthisdisciplineisadirectconsequenceoftheincreasingsigni?canceandsuccess of model-based methods in practice. Numerous e?orts resulted in the invention of concepts, languagesand tools for the de?nition, analysis,transformation, and veri?cationofdomain-speci?cmodelinglanguagesandgeneral-purposemodeling language standards, as well as their use for software and systems engineering. MODELS 2010, the 13th edition of the conference series, took place in Oslo, Norway, October 3-8, 2010, along with numerous satellite workshops, symposia and tutorials. The conference was fortunate to have three prominent keynote speakers: Ole Lehrmann Madsen (Aarhus University, Denmark), Edward A. Lee (UC Berkeley, USA) and Pamela Zave (AT&T Laboratories, USA). To provide a broader forum for reporting on scienti?c progress as well as on experience stemming from practical applications of model-based methods, the 2010 conference accepted submissions in two distinct tracks: Foundations and Applications. The primary objective of the ?rst track is to present new research results dedicated to advancing the state-of-the-art of the discipline, whereas the second aims to provide a realistic and veri?able picture of the current state-- the-practice of model-based engineering, so that the broader community could be better informed of the capabilities and successes of this relatively young discipline. This volume contains the ?nal version of the papers accepted for presentation at the conference from both tracks. On the Move to Meaningful Internet Systems 2005: OTM 2005 Workshops Zahir Tari 2005-10-11

Political Theology of International Order William Bain 2020-04-21 Is contemporary international order truly a secular arrangement? Theorists of international relations typically adhere to a narrative that portrays the modern states system as the product of a gradual process of secularization that transcended the religiosity of medieval Christendom. William Bain challenges this narrative by arguing that modern theories of international order reflect ideas that originate in medieval theology. They are, in other words, worldly applications of a theological pattern. This ground-breaking book makes two key contributions to scholarship on international order. First, it provides a thorough intellectual history of medieval and early modern traditions of thought and the way in which they shape modern thinking about international order. It explores the ideas of Augustine, Thomas Aquinas, William of Ockham, Martin Luther, and other

theologians to rise above the sharp differentiation of medieval and modern that underpins most international thought. Uncovering this theological inheritance invites a fundamental reassessment of canonical figures, such as Hugo Grotius and Thomas Hobbes, and their contribution to theorizing international order. Second, this book shows how theological ideas continue to shape modern theories of international order by structuring the questions theorists ask as well as the answer they provide. It argues that the dominant vocabulary of international order, system and society, anarchy, balance of power, and constitutionalism, is mediated by the intellectual commitments of nominalist theology. It concludes by exploring the implications of thinking in terms of this theological inheritance, albeit in a world where God is only one of several possibilities that can called upon to secure the regularity of order.

Applications of Graph Transformations with Industrial Relevance Andy Schürr 2008-10-15 This book constitutes the thoroughly refereed post-conference proceedings of the Third International Symposium on Applications of Graph Transformations, AGTIVE 2007, held in Kassel, Germany, in October 2007. The 30 revised full papers presented together with 2 invited papers were carefully selected from numerous submissions during two rounds of reviewing and improvement. The papers are organized in topical sections on graph transformation applications, meta-modeling and domain-specific language, new graph transformation approaches, program transformation applications, dynamic system modeling, model driven software development applications, queries, views, and model transformations, as well as new pattern matching and rewriting concepts. The volume moreover contains 4 papers resulting from the adjacent graph transformation tool contest and concludes with 9 papers

summarizing the state of the art of today's available graph transformation environments.

The Semantic Web - ISWC 2008 Amit P. Sheth 2008-10-14 This book constitutes the refereed proceedings of the 7th International Semantic Web Conference, ISWC 2008, held in Karlsruhe, Germany, during October 26-30, 2008. The volume contains 43 revised full research papers selected from a total of 261 submissions, of which an additional 3 papers were referred to the semantic Web in-use track; 11 papers out of 26 submissions to the semantic Web in-use track, and 7 papers and 12 posters accepted out of 39 submissions to the doctorial consortium. The topics covered in the research track are ontology engineering; data management; software and service engineering; non-standard reasoning with ontologies; semantic retrieval; OWL; ontology alignment; description logics; user interfaces; Web data and knowledge; semantic Web services; semantic social networks; and rules and relatedness. The semantic Web in-use track covers knowledge management; business applications; applications from home to space; and services and infrastructure.

Tenth Educational Conference, New York City, October 30 and 31, 1941 1942

The End and the Beginning Hermynia Zur Mühlen 2010 First published in Germany in 1929, The End and the Beginning is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Muhlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

The New World (dis)Order Charles Giuliani 2009-02-04 The world is run by

very different people than the visible political puppets that smile at the cameras. And these hidden elites have a terribly sinister agenda for global domination, working from behind the curtain. This book exposes how these criminals operate, controling our media, education system, government, banking system--and yes, even our churches--to keep us in ignorance as to what they are up to. After reading this study, you will never view the world the same way again.

Flexible Query Answering Systems Henning Christiansen 2011-11-10 This book constitutes the refereed proceedings of the 8th International Conference on Flexible Query Answering Systems, FQAS 2011, held in Roskilde, Denmark, in October 2011. The 43 papers included in this volume were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on logical approaches to flexible querying, fuzzy logic in spatial and temporal data modeling and querying, knowledge-based approaches, multimedia, data fuzziness, reliability and trust, information retrieval, preference queries, flexible querying of graph data, ranking, ordering and statistics, query recommendation and interpretation, as well as on fuzzy databases and applications (8 papers presented in a special session).

Knowledge Discovery, Knowledge Engineering and Knowledge Management Ana Fred 2013-04-10 This book constitutes the thoroughly refereed post-conference proceedings of the Third International Joint Conference on Knowledge Discovery, Knowledge Engineering, and Knowledge Management, IC3K 2011, held in Paris, France, in October 2011. This book includes revised and extended versions of a strict selection of the best papers presented at the conference; 39 revised full papers together with one invited lecture were carefully reviewed and selected from 429 submissions. According to the three covered conferences KDIR 2011, KEOD 2011, and KMIS 2011, the papers are organized in topical sections on knowledge discovery and information retrieval, knowledge engineering and ontology development, and on knowledge management and information sharing.
