The Global Smartphone Daniel Miller 2021-05-06 The smartphone is often literally right in front of our nose, so you would

think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

One, Holy, Catholic, and Apostolic K. D. Whitehead 2000-01-01 "Kenneth Whitehead shows in this book how, according to these same sources, the early Church was already in all essential respects the same Church as the Catholic Church of today. The Church consists of believers in Christ who profess her creed and are subject to the authority of her hierarchy, just as the first Christians accepted the preaching of the apostles chosen by Jesus and were subject to their authority (as can abundantly be seen in the Acts of the Apostles). The Church of Christ purveys both word and sacrament for the sake of the sanctification and salvation of her members through the ministry of ordained priests and bishops, all of whom are ultimately under the authority of the bishop of Rome, the Pope. All these things were also strictly true of "the early Church" - as demonstrated in this book."--BOOK JACKET.

Hidden Treasures Donald Kalff 2020-03-03 Europe is often presented as a declining global power, in which red tape, incumbency interests and governance flaws hamper economic performance, innovation and productivity. Part of this can be traced back to the inherent challenge and ambition of the European integration project; but also to external factors, including the rise of the United States as a global superpower during the past century, and the worldwide diffusion of ideas, especially in politics and economics, which were seldom originated in Europe, or tailored to its peculiar legal, economic and social traditions. Until recently, Europe has sought to carve out its model and role in global governance by mimicking many US policy approaches: shareholder capitalism, deregulation and unconstrained movement of capital. As the global community increasingly sees the rise of protectionist stances, and a growing inability to face emerging challenges such as sustainable development and the breath-taking rise of disruptive digital technologies, Europe should look at its best qualities to revamp and reclaim its position in the global order, to the benefit of all. The prospect of Brexit, while certainly not favourable for the Union, paradoxically opens up new opportunities to face emerging challenges with a greater degree of cohesion. This new book, a joint effort between Donald Kalff and a group of CEPS researchers led by Andrea Renda, aims at identifying and exploring Europe's 'hidden treasures', often neglected competitive advantages that

could, if adequately nurtured, return the Old Continent to the forefront of the global order. 'Hidden treasures' are a feature of the EU economy, legal system or legal tradition that are being given insufficient attention in EU public policy, and which bear the potential to increase Europe's competitiveness and overall positioning in the global context. The authors find them in ten policy domains, from contract law to corporate governance, taxation, control of corruption, competition policy, trade, innovation and the EU's unique approach to governing the digital economy. Uncovering and promoting hidden treasures becomes, as of today, a timely and highly needed exercise, as the EU approaches its post-elections transition, and the global governance context seems to be rapidly changing, shaping a new playing field in which Europe has no obvious allies, and is increasingly challenged by superpowers with different, if not diverging, priorities.

**Metric Pattern Cutting for Children's Wear and Babywear** Winifred Aldrich 2009-07-14 This fourth edition of *Metric Pattern Cutting for Children's Wear and Babywear* remains the standard text book but has three major improvements. First, the sections have been re-organised to reflect changes in producing and marketing children's clothes. Today's popularity of easy-fitting styles and knitted fabrics means that basic 'flat' pattern cutting is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade. The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations. Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys' and girls' measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. 'Plus' charts for heavier children have also been added.

**Come Together** Richard Courtney 2011-03-21 As the greatest rock and roll band of all time, the Beatles rocketed to worldwide fame soon after their 1964 arrival in the United States. Much of their achievement can be attributed to the unique Beatle sound, but it was more than just the music that catapulted them to the summit of success, and kept them there even after the band ceased touring and broke apart. How the Beatles both failed and triumphed as businessmen and the lessons today's entrepreneurs and business leaders can draw from this unique journey is the subject of *Come*

Together: The Business Wisdom of the Beatles. Authors Richard Courtney and George Cassidy recount the band's many exploits, from its early struggles in Hamburg to the success of Sgt. Peppers Lonely Hearts Club Band and beyond, revealing from a business perspective what worked and what didn't. More than the music, this book explores what it took to pass the audition.

Serger Repair for the Home Sewer Reuben O. Doyle 2016-12-21 Do it yourself Serger machine repair!!! Sound like a far fetched idea? Not so, according to Reuben O. Doyle, a sewing machine repairman of 25 years and author of "Serger Repair for the Home Sewer." "In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service repairman for repair or replacement, but those types of service calls are by far the minority!" Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum. The home sewer can now just look up the problem in this handy guide book and follow the instructions on how to fix it. YES, it's now as easy to fix your serger machine as picking up a book!

The Secret of Teams Mark Miller 2011-10-03 Teams are critical to the success of every organization. Departmental, interdepartmental, cross-functional, ad hoc, task-specific—teams do everything from planning the office party to setting the annual budget to establishing performance goals. But what separates the teams that really deliver from the ones that simply spin their wheels? What is the secret of high-performance teams? As he did in The Secret, Mark Miller uses a compelling business fable to reveal profound yet easily grasped truths that can dramatically transform any organization. Debbie Brewster, the heroine of The Secret, has been promoted and is now struggling with taking her new team to the next level. Her old mentor, Jeff Brown, the company's CEO, sends her out to find the secret of teams. On her journey she learns from three very different teams—the Special Forces, NASCAR, and a local restaurant. Debbie and her team

discover the three elements that all successful teams have in common. But that's just the beginning. The devil is in the details, as the story of Debbie's efforts to actually implement the three elements shows. You'll learn how to change entrenched ways of thinking and acting, what you have to do to optimize each of the three elements of a successful team, how to measure your progress, and more. Creating high-performance teams does more than just give your organization a competitive advantage. It can be a performance multiplier that significantly improves results while honoring and developing people. It may be the ultimate win-win-win that your organization is seeking.
