The Microeconomics Anti-Textbook Rod Hill 2021-12-02 Mainstream textbooks present economics as an objective science, free from value judgements. The Microeconomics Anti-Textbook demonstrates this to be a myth – one which serves

to make such textbooks not only off-puttingly bland, but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way, before presenting an 'anti-text' analysis and critique. Challenging the assumptions, arguments, and models, Hill and Myatt provide the essential guide to decoding the textbooks, and show that real economics is far more interesting - and subversive - than the simplistic version presented to students.

The Legal and Regulatory Environment of Business Robert Neil Corley 1996 Upon its publication in 1963, Corley's Legal Environment of Business was the first and only business law textbook to emphasize public rather than private law, government regulation of business rather than contracts, and legal relationships rather than business transactions. A major innovation, it established a new course that the authors termed the legal environment of business. Over the years others have attempted to attain the success and stature of The Legal and Regulatory Environment of Business, but none has been able to match its timely, innovative coverage. Substantially updated, the 10th edition continues the text's reputation for ethics, authority and coverage of current areas of importance to business.

Macroeconomics Michael Parkin 2022 "To change the way students see the world: this is my goal in teaching economics and in writing this book. Three facts about students are my guiding principles. First, they want to learn, but they are over-

whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's world and be better prepared for life after school. So, they must be shown how to apply the timeless principles of economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles"--
