Nelson Thornes A2 Chemistry Answers Chapter 6

Recognizing the pretension ways to get this books Nelson Thornes A2 Chemistry Answers Chapter 6 is additionally useful. You have remained in right site to begin getting this info. get the Nelson Thornes A2 Chemistry Answers Chapter 6 belong to that we present here and check out the link.

You could purchase lead Nelson Thornes A2 Chemistry Answers Chapter 6 or acquire it as soon as feasible. You could quickly download this Nelson Thornes A2 Chemistry Answers Chapter 6 after getting deal. So, when you require the books swiftly, you can straight acquire it. Its in view of that unconditionally easy and as a result fats, isnt it? You have to favor to in this song

Environment and Tourism Andrew Holden 2000 For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: * how the economics of tourism can be adopted in a positive way to aid conservation * whether the concept of sustainability can be applied to tourism * provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates.
AQA Biology: A Level Glenn Toole 2016-05-05 Please note this title is suitable for any student studying: Exam Board: AQA Level: A Level Subject: Biology First teaching: September 2015 First exams: June 2017 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward explanations to develop true subject knowledge and allow students to link ideas together while developing essential exam skills.
Cambridge International AS and A Level Chemistry Coursebook with CD-ROM Lawrie Ryan 2014-07-31 Fully revised and updated content matching new Cambridge International Examinations 9701 syllabus for first examination in 2016. Endorsed by Cambridge International Examinations, this digital edition comprehensively covers all the knowledge and skills students need during the A Level Chemistry course (9701), for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.
Teaching Today Geoff Petty 2009 The edition hss been updated to become more PGCE focused. In particular, it now includes signposting for coverage of the FENTO standards and further coverage of key areas such as interactive whiteboard training.
An Introduction to Polymer Physics David I. Bower 2002-05-30 Publisher Description
Crystals and Crystal Structures Richard J. D. Tilley 2006-08-14 Crystals and Crystal Structures is an introductorytext for students and others who need to understand the subjectwithout necessarily becoming crystallographers. Using the book willenable students to read scientific papers and articles describing acrystal structure or use crystallographic databases with confidenceand understanding. Reflecting the interdisciplinary nature of the subject the bookincludes a variety of applications as diverse as the relationshipbetween physical properties and symmetry, and molecular and proteincrystallography. As well as covering the basics the book containsan introduction to areas of crystallography, such as modulatedstructures and quasicrystals, and protein crystallography, whichare the subject of important and activeresearch. A non-mathematical introduction to the key elements of thesubject Contains numerous applications across a variety ofdisciplines Includes a range of problems and exercises Clear, direct writing style "…the book contains a wealth of information and itfulfils its purpose of providing an interesting and broadintroduction to the terpenes." CHEMISTRY WORLD, February2007
OCR A level Chemistry Student Mike Smith 2015-06-26 This is an OCR endorsed resource Stretch and challenge your students' knowledge and understanding of Chemistry, build their mathematical and practical skills, and provide plenty of assessment guidance with this OCR Year 1 Student Book. - Build understanding with a summary of prior knowledge and diagnostic questions at the start of each chapter to help bring students up to speed - Support practical assessment with Practical Skill summaries that help develop your students' knowledge and skills - Test understanding and provide plenty of practice to assess progression, with Test Yourself Questions and multiple choice questions - Provide mathematical support with examples of method integrated throughout and a dedicated 'Maths in Chemistry' chapter - Develop understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries OCR A Level Chemistry Student Book 1 includes AS Level
AQA Physics: A Level Jim Breithaupt 2016-05-05 Please note this title is suitable for any student studying: Exam Board: AQA Level: A Level Subject: Physics First teaching: September 2015 First exams: June 2017 Fully revised and updated for the new linear qualification, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward explanations to develop real subject knowledge and allow students to link ideas together while developing essential exam skills. N.B.Covers all optional AQA Physics topics with introduction and summary sections; full support for each option is provided on AQA A Level Physics Kerboodle.
Secondary Science 11 to 16 Gren Ireson 2010-03-15 Are you looking for teaching ideas to make your science lessons come alive? Full of suggestions for exciting practical work to engage children, this book addresses and explains the science behind the experiments, and emphasises the need to engage the learner through minds-on activities. It shows you where to make links to the national curricula in England, Scotland, Wales and Northern Ireland, and it covers the three sciences: chemistry, biology and physics. The detailed subject knowledge helps you grasp key concepts, and there are lots of useful diagrams to illustrate important points. Experiments include: - extracting DNA from a kiwi fruit - capturing rainbows - the chromatography of sweets - removing iron from cornflakes - a plate tectonic jigsaw These practical activities will provide you with ways to ensure your students respond enthusiastically to science, and the book will also help you develop your subject knowledge and ensure you meet your Qualified Teacher Status (QTS) standards. Perfect reading for Secondary Science PGCE students, as well as those on the Graduate Teacher Programme (GTP), this book is also ideal for non-specialists who are looking for support as they get to grips with the sciences. Gren Ireson is Professor of Science Education at Nottingham Trent University. Mark Crowley is a Teaching Research Fellow in the Centre for Effective Learning in Science, Nottingham Trent University. Ruth Richards is Subject Strand Leader for the PGCE and Subject Knowledge Enhancement (SKE) courses in Science at Nottingham Trent University, and an examiner for A-level Geology. John Twidle

is Subject Leader for the PGCE and MSc Science programmes at Loughborough University.
AQA Biology: A Level Year 1 and AS Glenn Toole 2016-02-18 Please note this title is suitable for any student studying: Exam Board: AQA Level: AS Level Subject: Biology First teaching: September 2015 First exams: June 2016 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward explanations to develop true subject knowledge and allow students to link ideas together while developing essential exam skills.
Good Practice In Science Teaching: What Research Has To Say Osborne, Jonathan 2010-05-01 This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching. It offers an overview of scholarship and research in the field, and introduces the ideas and evidence that guide it.
Sample Preparation Techniques in Analytical Chemistry Somenath Mitra 2004-04-07 The importance of accurate sample preparation techniques cannot be overstated--meticulous sample preparation is essential. Often overlooked, it is the midway point where the analytes from the sample matrix are transformed so they are suitable for analysis. Even the best analytical techniques cannot rectify problems generated by sloppy sample pretreatment. Devoted entirely to teaching and reinforcing these necessary pretreatment steps, Sample Preparation Techniques in Analytical Chemistry addresses diverse aspects of this important measurement step. These include: * State-of-the-art extraction techniques for organic and inorganic analytes * Sample preparation in biological measurements * Sample pretreatment in microscopy * Surface enhancement as a sample preparation tool in Raman and IR spectroscopy * Sample concentration and clean-up methods * Quality control steps Designed to serve as a text in an undergraduate or graduate level curriculum, Sample Preparation Techniques in Analytical Chemistry also provides an invaluable reference tool for analytical chemists in the chemical, biological, pharmaceutical, environmental, and materials sciences.
Fundamentals of Medicinal Chemistry Gareth Thomas 2004-04-20 Provides a concise introduction to the chemistry of therapeutically active compounds, written in a readable and accessible style. The title begins by reviewing the structures and nomenclature of the more common classes of naturally occurring compounds found in biological organisms. An overview of medicinal chemistry is followed by chapters covering the discovery and design of drugs, pharmacokinetics and drug metabolism, The book concludes with a chapter on organic synthesis, followed by a brief look at drug development from the research stage through to marketing the final product. The text assumes little in the way of prior biological knowledge. relevant biology is included through biological topics, examples and the Appendices. Incorporates summary sections, examples, applications and problems Each chapter contains an additional summary section and solutions to the questions are provided at the end of the text Invaluable for undergraduates studying within the chemical, pharmaceutical and life sciences.
AQA Chemistry AS Ted Lister 2008 AQA Chemistry is the only set of resources to have been developed with, and exclusively endorsed by, AQA, making them the first choice to support the new AQA specification for AS and A2. With a range of truly blended resources, AQA Chemistry offers complete coverage and support through a variety of printed and electronic media. By working closely with AQA , Nelson Thornes have produced resources that will give students and teachers all they need to work through the specification with complete confidence.
Inorganic Chemistry J. E. House 2012 This textbook provides essential information for students of inorganic chemistry or for chemists pursuing self-study. The presentation of topics is made with an effort to be clear and concise so that the book is portable and user friendly. Inorganic Chemistry 2E is divided into five major themes (structure, condensed phases, solution chemistry, main group and coordination compounds) with several chapters in each. There is a logical progression from atomic structure to molecular structure to properties of substances based on molecular structures, to behavior of solids, etc. The author emphasizes fundamental principles-including molecular structure, acid-base chemistry, coordination chemistry, ligand field theory, and solid state chemistry -and presents topics in a clear, concise manner. There is a reinforcement of basic principles throughout the book. For example, the hard-soft interaction principle is used to explain hydrogen bond strengths, strengths of acids and bases, stability of coordination compounds, etc. The book contains a balance of topics in theoretical and descriptive chemistry. New to this Edition: New and improved illustrations including symmetry and 3D molecular orbital representations Expanded coverage of spectroscopy, instrumental techniques, organometallic and bio-inorganic chemistry More in-text worked-out examples to encourage active learning and to prepare students for their exams • Concise coverage maximizes student understanding and minimizes the inclusion of details students are unlikely to use. • Discussion of elements begins with survey chapters focused on the main groups, while later chapters cover the elements in greater detail. • Each chapter opens with narrative introductions and includes figures, tables, and end-of-chapter problem sets.
On Food and Cooking Harold McGee 2007-03-20 A kitchen classic for over 35 years, and hailed by Time magazine as "a minor masterpiece" when it first appeared in 1984, On Food and Cooking is the bible which food lovers and professional chefs worldwide turn to for an understanding of where our foods come from, what exactly they're made of, and how cooking transforms them into something new and delicious. For its twentieth anniversary, Harold McGee prepared a new, fully revised and updated edition of On Food and Cooking. He has rewritten the text almost completely, expanded it by two-thirds, and commissioned more than 100 new illustrations. As compulsively readable and engaging as ever, the new On Food and Cooking provides countless eye-opening insights into food, its preparation, and its enjoyment. On Food and Cooking pioneered the translation of technical food science into cook-friendly kitchen science and helped birth the inventive culinary movement known as "molecular gastronomy." Though other books have been written about kitchen science, On Food and Cooking remains unmatched in the accuracy, clarity, and thoroughness of its explanations, and the intriguing way in which it blends science with the historical evolution of foods and cooking techniques. Among the major themes addressed throughout the new edition are: · Traditional and modern methods of food production and their influences on food quality · The great diversity of methods by which people in different places and times have prepared the same ingredients · Tips for selecting the best ingredients and preparing them successfully · The particular substances that give foods their flavors, and that give us pleasure · Our evolving knowledge of the health benefits and risks of foods On Food and Cooking is an invaluable and monumental compendium of basic information about ingredients, cooking methods, and the pleasures of eating. It will delight and fascinate anyone who has ever cooked, savored, or wondered about food.
Biology with Human Biology John Adds 2001 Make the Grade in AS Biology with Human Biology has been specially written to give students comprehensive exam support for senior secondary level Biology and Human Biology. It is a comprehensive revision guide for students that includes a bank of activities and questions for use throughout the course, with exam questions, including synoptic questions, to help students fully prepare for examinations.
The School Science Review 2002
A-Level Chemistry E. N. Ramsden 1994-01-01 In this third edition of a textbook for A-Level chemistry, each topic starts at a level accessible to students who have attained Level 7/8 of the National Curriculum in Science, and is treated from the beginning without assuming that work from a previous course has been remembered.
Analysis and Performance of Fiber Composites Bhagwan D. Agarwal 1990-10-08 Having fully established themselves as workable engineering materials, composite materials are now increasingly commonplace around the world. Serves as both a text and reference guide to the behavior of composite materials in different engineering applications. Revised for this Second Edition, the text includes a general discussion of composites as material, practical aspects of design and performance, and further analysis that will be helpful to those engaged in research on composites. Each chapter closes with references for further reading and a set of problems that will be useful in developing a better understanding of the subject.
Advanced Chemistry for You Lawrie Ryan 2000 Designed to be motivating to the student, this book includes features that are suitable for individual learning. It covers the AS-Level and core topics of almost all A2 specifications. It provides many questions for students to develop

their competence. It also includes sections on 'Key Skills in Chemistry', 'Practical Skills' and 'Study Skills'.
Drug Metabolism Mino R. Caira 2006-07-10 Drug Metabolism: Current Concepts provides a comprehensive understanding of the processes that take place following ingestion of a medicinal agent or xenobiotic, with an emphasis on the crucial role of metabolism (biotransformation). How a sound knowledge of these phenomena is incorporated into the design of effective new drug candidates is also explained. The user-friendly text focuses on concepts rather than extraneous details and is supported by many illustrated examples of biotransformations as well as frequent references to current critical reviews and articles highlighting the nature of research objectives in this vibrant area of medicinal development. The final topic on strategies for drug design relies on the background provided by the rest of the book. This book is ideally suited as an advanced text for courses in drug metabolism for students of medicine, pharmacy, pharmacology, biochemistry; and for courses in drug design and drug delivery for students of medicinal chemistry. It is also appropriate for professional seminars or courses that relate to the fate of a drug in the body, drug interactions, adverse reactions and drug design.
New Biology for You Gareth Williams 2002-03-25 Biology For You has been updated to offer comprehensive coverage of the revised GCSE specifications. It can be used with either mixed ability or streamed sets and higher tier materials are clearly marked.
Algae Based Polymers, Blends, and Composites Khalid Mahmood Zia 2017-06-19 Algae Based Polymers, Blends, and Composites: Chemistry, Biotechnology and Material Sciences offers considerable detail on the origin of algae, extraction of useful metabolites and major compounds from algal bio-mass, and the production and future prospects of sustainable polymers derived from algae, blends of algae, and algae based composites. Characterization methods and processing techniques for algae-based polymers and composites are discussed in detail, enabling researchers to apply the latest techniques to their own work. The conversion of bio-mass into high value chemicals, energy, and materials has ample financial and ecological importance, particularly in the era of declining petroleum reserves and global warming. Algae are an important source of biomass since they flourish rapidly and can be cultivated almost everywhere. At present the majority of naturally produced algal biomass is an unused resource and normally is left to decompose. Similarly, the use of this enormous underexploited biomass is mainly limited to food consumption and as bio-fertilizer. However, there is an opportunity here for materials scientists to explore its potential as a feedstock for the production of sustainable materials. Provides detailed information on the extraction of useful compounds from algal biomass Highlights the development of a range of polymers, blends, and composites Includes coverage of characterization and processing techniques, enabling research scientists and engineers to apply the information to their own research and development Discusses potential applications and future prospects of algae-based biopolymers, giving the latest insight into the future of these sustainable materials
Fundamentals of Geomorphology Richard John Huggett 2011-03-15 This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world’s landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.
Children's Books in Print, 2007 2006
A-level Physics Roger Muncaster 1993 This extensively revised 4th edition of an established physics text offers coverage of the recent developments at A/AS-Level, with each topic explained in straightforward terms, starting at an appropriate Level (7/8) of the National Curriculum
Chemistry Lawrie Ryan 2002 This is a Foundation GCSE Chemistry course written to cover all the major specifications, preparing students for Single and Double Award Chemistry. Exam questions are included throughout the texts.
AQA A2 Chemistry John Bentham 2009-01-20 Written by AQA examiners, this is a revised and updated edition of Collins Student Support Materials for AQA A2 Chemistry. It fully supports the new 2008 AQA Chemistry specification for Unit 4. All the knowledge you need is summarised so you can use it as a study guide or revision guide to ensure success in your exam. This book provides a clear and easy path to learning all the essential information in the new 2008 AQA Chemistry A2 specification for Unit 4: Kinetics, Equilibria and Organic Chemistry. It is the perfect way to support your studies and an excellent revision guide. It includes: -How Science Works guidance to help tackle this new key focus in the specification -Examiner's Notes boxes to give advice on exam technique and warn of common misconceptions -Essential Notes boxes to highlight crucial information -Definition boxes and a comprehensive glossary to help memorise essential terminology -Practice questions to help prepare for exams -An index for quick reference
AQA Chemistry: A Level Ted Lister 2016-05-05 Please note this title is suitable for any student studying: Exam Board: AQA Level: A Level Subject: Chemistry First teaching: September 2015 First exams: June 2017 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this Student Book supports and extends students through the new course whilst delivering the maths, practical and synoptic skills needed to succeed in the new A Levels and beyond. The book uses clear straightforward explanations to develop real subject knowledge and allow students to link ideas together, while developing essential exam skills.
Oxford Guide to Behavioural Experiments in Cognitive Therapy Khadj Rouf 2004-05-06 Behavioural experiments are one of the central and most powerful methods of intervention in cognitive therapy. Yet until now, there has been no volume specifically dedicated to guiding physicians who wish to design and implement behavioural experiments across a wide range of clinical problems. The Oxford Guide to Behavioural Experiments in Cognitive Therapy fills this gap. It is written by clinicians for clinicians. It is a practical, easy to read handbook, which is relevant for practising clinicians at every level, from trainees to cognitive therapy supervisors. Following a foreword by David Clark, the first two chapters provide a theoretical and practical background for the understanding and development of behavioural experiments. Thereafter, the remaining chapters of the book focus on particular problem areas. These include problems which have been the traditional focus of cognitive therapy (e.g. depression, anxiety disorders), as well as those which have only more recently become a subject of study (bipolar disorder, psychotic symptoms), and some which are still in their relative infancy (physical health problems, brain injury). The book also includes several chapters on transdiagnostic problems, such as avoidance of affect, low self-esteem, interpersonal issues, and self-injurious behaviour. A final chapter by Christine Padesky provides some signposts for future development. Containing examples of over 200 behavioural experiments, this book will be of enormous practical value for all those involved in cognitive behavioural therapy, as well as stimulating exploration and creativity in both its readers and their patients.
Aqa Physics as Jim Breithaupt 2014-12-01 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this student book supports and extends students through the new course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond.
Chemistry for Sustainable Development Minu Gupta Bhowon 2012-01-08 Chemistry for Sustainable Development is a collection of selected papers by the participants of the International Conference on Pure and Applied Chemistry (ICPAC 2010) on the theme of “Chemistry for

Sustainable Development" held in Mauritius in July 2010. In light of the significant progresses and challenges in the development and implementation of green and sustainable chemistry, this volume reviews the recent results generated by a more efficient use of resources to minimize carbon footprints, to foster the eradication or minimisation of solvent use in chemistry, and to deliver processes which lead to increased harmony between chemistry and the environment. Chemistry for Sustainable Development is written for graduates, postgraduates, researchers in industry and academia who have an interest in the fields ranging from fundamental to applied chemistry.

The Psychology of Effective Learning and Teaching Matt Jarvis 2005 This book covers the psychology of teaching and learning and focuses on applying up-to-date, as well as traditional, theory in the classroom. It covers a range of issues that most concern the new teacher, written clearly and at an appropriate level. Highly accessible and contemporary, The Psychology of Learning and Teaching covers newer modular theories and their implications for learning styles.

Complete Chemistry for Cambridge IGCSE® RoseMarie Gallagher 2015-09-03 Fully updated and matched to the Cambridge syllabus, this stretching Student Book is trusted by teachers around the world to support advanced understanding and achievement at IGCSE. The popular, stretching approach will help students to reach their full potiential. Written by experienced authors, this updated edition is full of engaging content with up-to-date examples to cover all aspects of the Cambridge syllabus. The step-by-step approach will lead students through the course in a logical learning order building knowledge and practical skills with regular questions and practical activities. Extension material will stretch the highest ability students and prepare them to take the next step in their learning. Practice exam questions will consolidate student understanding and prepare them for exam success. You will also receive free access to extra support online, including practice exam questions, revision checklists and advice on how to prepare for an examination.

Advanced Physics Jonathan Allday 2020-10-08 Written by members of the Editorial Board of the Institute of Physics, Advanced Physics makes A-level physics accessible to all students, with Maths boxes throughout to support concept development. Questions give opportunities to practise recall and analytical skills, and there are high quality diagrams and full colour illustrations throughout.

Aqa Chemistry as Level Student Book Ted Lister 2014-12-01 Fully revised and updated for the new linear qualification, written and checked by curriculum and specification experts, this Student Book supports and extends students through the new course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond.

A2 Physics Dave Kelly 2010-03 Checked by AQA examiners, this is a revised and updated edition of Collins Student Support Materials for AQA that fully supports the 2008 AQA (A) Physics A2 specification for Unit 5 and the Option Units. All the knowledge you need is summarised so you can use it as a study guide or revision guide to ensure success in your exam. This book provides a clear and easy path to learning all the essential information in the 2008 AQA (A) Physics A2 specification. It is the perfect way to support your studies and an excellent revision guide. It includes: - Updated notes on Unit 5 Nuclear and Thermal Physics and new notes on units 5A Astrophysics, 5B Medical Physics, 5C Applied Physics and 5D Turning Points in Physics -How Science Works guidance to help tackle this new key focus in the specification -Examiner's Notes boxes to give advice on exam technique and warn of common misconceptions -Essential Notes boxes to highlight crucial information -Definition boxes and a comprehensive glossary to help memorise essential terminology -Practice questions to help prepare for exams -An index for quick reference

A-Level Chemistry Eileen Ramsden 2020-10-08 This highly regarded textbook covers all the main A Level Chemistry specifications.

Heavy Quark Effective Theory Andrey G. Grozin 2004-04-07 This up-to-date review also serves as an introduction to Heavy Quark Effective Theory (HQET) - a new approach to heavy quark physics problems in Quantum Chromodynamics (QCD). The book also contains a detailed discussion of the methods of calculation used in HQET, along with numerous illustrations.
