Folk Devils and Moral Panics Stanley Cohen 2011 'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, Folk Devils and Moral Panics is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

Principia Mathematica Alfred North Whitehead 1927 Principia Mathematica was first published in 1910-13; this is the ninth impression of the second edition of 1925-7. The Principia has long been recognised as one of the intellectual landmarks of the century. It was the first book to show clearly the close relationship between mathematics and formal logic. Starting from a minimal number of axioms, Whitehead and Russell display the structure of both kinds of thought. No other book has had such an influence on the subsequent history of mathematical philosophy.

The Death of Sacred Texts Kristina Myrvold 2016-03-09 The Death of Sacred Texts draws attention to a much neglected topic in the study of sacred texts: the religious and ritual attitudes towards texts which have become old and damaged and can no longer be used for reading practices or in religious worship. This book approaches religious texts and scriptures by focusing on their physical properties and the dynamic interactions of devices and habits that lie beneath and within a given text. In the last decades a growing body of research studies has directed attention to the multiple uses and ways people encounter written texts and how they make them alive, even as social actors, in different times and cultures. Considering religious people seem to have all the motives for giving their sacred texts a respectful symbolic treatment, scholars have paid surprisingly little attention to the ritual procedures of disposing and renovating old texts. This book fills this gap, providing empirical data and theoretical analyses of historical and contemporary religious attitudes towards, and practices of text disposals within, seven world religions: Judaism, Islam, Christianity, Hinduism, Buddhism, Jainism and Sikhism. Exploring the cultural and historical variations of rituals for religious scriptures and texts (such as burials, cremations and immersion into rivers) and the underlying beliefs within the religious traditions, this book investigates how these religious practices and stances respond to modernization and globalization processes when new technologies have made it possible to mass-produce and publish religious texts on the Internet.

Spaces of Security and Insecurity Alan Ingram 2016-04-01 Drawing on critical geopolitics and related strands of social theory, this book combines new case studies with theoretical and methodological reflections on the geographical analysis of security and insecurity. It brings together a mixture of early career and more established scholars and interprets security and the war on terror across a number of domains, including: international law, religion, migration, development, diaspora, art, nature and social movements. At a time when powerful projects of globalization and security continue to extend their reach over an increasingly wide circle of people and places, the book demonstrates the relevance of critical geographical imaginations to an interrogation of the present.

The Hoarding Impulse Renee M. Winters 2015-06-19 There has been an increased awareness of hoarding in recent years, but clinical treatments aimed at helping people with this condition often have low success rates. In The Hoarding Impulse Renee M. Winters explores how depth psychology can enrich current conceptual models and treatment standards for compulsive hoarding. The book presents case studies of prominent sufferers including Edie and Edith Beale, the Collyer Brothers, and Andy Warhol and explores common themes of loss, shame and object clusters. Winters sets out to provide a clear understanding of a hoarder's lived experiences and their core schemas of value, worth and personal identity, revealing a direct connection to excessive acquisition of objects. She illuminates the process of how objects can come to possess a hoarder and become not only their main source of happiness but also part of their identity and in doing so puts forward a new treatment plan based on providing a deeper understanding of and potent treatment approach to what is a core issue for hoarding individuals: the wounding of the soul. This new perspective to treating individuals who hoard helps them in the long term understand their processes, value system, and struggles with negative interpersonal relationships. Providing a fascinating insight into the psyche of people who struggle with hoarding, this book will be essential reading for depth psychologists, Jungian psychotherapists, psychiatrists, social workers, students of analytical psychology and anyone interested in understanding the dynamics of this complex condition.

Applied Predictive Modeling Max Kuhn 2013-05-17 Applied Predictive Modeling covers the overall predictive modeling process, beginning with the crucial steps of data preprocessing, data splitting and foundations of model tuning. The text then provides intuitive explanations of numerous common and modern regression and classification techniques, always with an emphasis on illustrating and solving real data problems. The text illustrates all parts of the modeling process through many hands-on, real-life examples, and every chapter contains extensive R code for each step of the process. This multi-purpose text can be used as an introduction to predictive models and the overall modeling process, a practitioner's reference handbook, or as a text for advanced undergraduate or graduate level predictive modeling courses. To that end, each chapter contains problem sets to help solidify the covered concepts and uses data available in the book's R package. This text is intended for a broad audience as both an introduction to predictive models as well as a guide to applying them. Non-mathematical readers will appreciate the intuitive explanations of the techniques while an emphasis on problem-solving with real data across a wide variety of applications will aid practitioners who wish to extend their expertise. Readers should have knowledge of basic statistical ideas, such as correlation and linear regression analysis. While the text is biased against complex equations, a mathematical background is needed for advanced topics.

Ethno-symbolism and Nationalism Anthony D. Smith 2009-02-02 Anthony D. Smith is Emeritus Professor of Nationalism and Ethnicity at the London School of Economics, and is considered one of the founders of the interdisciplinary field of nationalism studies. Anthony Smith has developed an approach to the study of nations and nationalism called ethno-symbolism, which is concerned with the nature of ethnic groups and nations, and the need to consider their symbolic dimensions. This text provides a concise statement of an ethno-symbolic approach to the study of nations and nationalism and at the same time, embodies a general statement of Anthony Smith's contribution to this approach and its application to the central issues of nations and nationalism. The text: sets out the theoretical background of the emergence of ethno-symbolism in a sustained and systematic argument explains its analysis of the formation of nations, their persistence and change and the role of nationalism demonstrates that an ethno-symbolic approach provides an important supplement and corrective to past and present intellectual orthodoxies in the field and addresses the main theoretical criticisms levelled at an ethno-symbolic approach. Drawing together and developing earlier brief resumes of Anthony Smith's approach, this book represents a summary of the theoretical aspects of his work in the field since 1986. It will be useful to students and to all those who are interested in the issues raised by a study of ethnicity, nations and nationalism.

Designing the Olympics Jilly Traganou 2016-04-14 Designing the Olympics claims that the Olympic Games provide opportunities to reflect on the relationship between design, national identity, and citizenship. The "Olympic design milieu" fans out from the construction of the Olympic city and the creation of emblems, mascots, and ceremonies, to the consumption, interpretation, and appropriation of Olympic artifacts from their conception to their afterlife. Besides products that try to achieve consensus and induce civic pride, the "Olympic design milieu" also includes processes that oppose the Olympics and their enforcement. The book examines the graphic design program for Tokyo 1964, architecture and urban plans for Athens 2004, brand design for London 2012, and practices of subversive appropriation and sociotechnical action in counter-Olympic movements since the 1960s. It explores how the Olympics shape the physical, legal and emotional contours of a host nation and its position in the world; how the Games are contested by a broader social spectrum within and beyond the nation; and how, throughout these encounters, design plays a crucial role. Recognizing the presence of multiple actors, the book investigates the potential of design in promoting equitable political participation in the Olympic context.

Decolonizing Methodologies Linda Tuhiwai Smith 2016-03-15 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Legacies of the Rue Morgue Andrea Goulet 2015-12-02 Taking Edgar Allan Poe's 1841 "The Murders in the Rue Morgue" as an inaugural frame, Andrea Goulet traces shifting representations of violence, space, and nation in

French crime fiction from serial novels of the 1860s to cyberpunk fictions today. She argues that the history of spatial sciences—geology, paleontology, cartography—helps elucidate the genre's fundamental tensions: between brutal murder and pure reason; historical past and reconstructive present; national identity and global networks. As the sciences underlying her analysis make extensive use of strata and grids, Goulet employs vertical and horizontal axes to orient and inform her close readings of crime novels. Vertically, crimes that take place underground subvert above-ground modernization, and national traumas of the past haunt present criminal spaces. Horizontally, abstract crime scene maps grapple with the sociological realities of crime, while postmodern networks of international data trafficking extend colonial anxieties of the French nation. Crime gangs in the catacombs of 1860s Paris. Dirt-digging detectives in coastal caves at the fin-de-siècle. Schizoid cartographers in global cyberspace. Crime fiction's sites of investigation have always exposed central rifts in France's national identity while signaling broader, enduring unease with violent disruptions to social order. Reading murder novels of the last 150 years in the context of shifting sciences, *Legacies of the Rue Morgue* provides a new spatial history of modern crime fiction.

Just Because We Are the 99% Miss Mary 2012-03 This book is about the year 2011 and the 99%. In a rush to punish President Obama, the 99% elected more of the "NO" party into office in the 2010 midterms. Even after eight years of economic manipulations which resulted in our financial meltdown, the 99% decided to reward the "NO" party with more representatives. This book is about the end result of that vote. It is about the 99% being 100% responsible for our economic non-recovery. The 99% diluted its power and the 99% paid the price with Republican's obsession for new abortion laws and voting restrictions The promise of job creation was ignored by those elected in 2010. This is a book explaining the manipulation of the 99% and the 99% allowing that manipulation. Hopefully, at the end of this book, the 99% will finally be motivated to get past their subconscious racism, which makes the 99% vulnerable to divisive manipulation. Hopefully, the 99% will understand the need to stop dividing and unify.

Geospatial Intelligence Robert M. Clark 2020-09-01 A riveting introduction to the complex and evolving field of geospatial intelligence. Although geospatial intelligence is a term of recent origin, its underpinnings have a long and interesting history. *Geospatial Intelligence: Origins and Evolution* shows how the current age of geospatial knowledge evolved from its ancient origins to become ubiquitous in daily life across the globe. Within that framework, the book weaves a tapestry of stories about the people, events, ideas, and technologies that affected the trajectory of what has become known as GEOINT. Author Robert M. Clark explores the historical background and subsequent influence of fields such as geography, cartography, remote sensing, photogrammetry, geopolitics, geophysics, and geographic information systems on GEOINT. Although its modern use began in national security communities, Clark shows how GEOINT has rapidly extended its reach to other government agencies, NGOs, and corporations. This global explosion in the use of geospatial intelligence has far-reaching implications not only for the scientific, academic, and commercial communities but for a society increasingly reliant upon emerging technologies. Drones, the Internet of things, and cellular devices transform how we gather information and how others can collect that information, to our benefit or detriment.

Islam and the Arab Awakening Tariq Ramadan 2012-10-12 One of the most important developments in the modern history of the Middle East, the so-called Arab Spring began in Tunisia in December 2010, bringing down dictators, sparking a civil war in Libya, and igniting a bloody uprising in Syria. Its long-term repercussions in Egypt and elsewhere remain unclear. Now one of the world's leading Islamic thinkers examines and explains it, in this searching, provocative, and necessary book. Time Magazine named Tariq Ramadan one of the most important innovators of the twenty-first century. A Muslim intellectual and prolific author, he has won global renown for his reflections on Islam and the contemporary challenges in both the Muslim majority societies and the West. In Islam and the Arab Awakening, he explores the uprisings, offering rare insight into their origin, significance, and possible futures. As early as 2003, he writes, there had been talk of democratization in the Middle East and North Africa. The U.S. government and private organizations set up networks and provided training for young leaders, especially in the use of the Internet and social media, and the West abandoned its unconditional support of authoritarian governments. But the West did not create the uprisings. Indeed, one lesson Ramadan presents is that these mass movements and their consequences cannot be totally controlled. Something irreversible has taken place: dictators have been overthrown without weapons. But, he writes, democratic processes are only beginning to emerge, and unanswered questions remain. What role will religion play? How should Islamic principles and goals be rethought? Can a sterile, polarizing debate between Islamism and secularism be avoided? Avoiding both naive confidence and conspiratorial paranoia, Ramadan voices a tentative optimism. If a true civil society can be established, he argues, this moment's fragile hope will live.

English Ministry Crisis in Chinese Canadian Churches Matthew Richard Sheldon Todd 2015-03-26 In this book, Dr. Matthew Todd looks into the anecdotal reporting of high numbers of Canadian-born Chinese leaving Western Canadian Chinese churches--what is termed the silent exodus. Some of the fastest-growing Canadian churches are Chinese, yet reportedly the highest dropout rates are among Chinese and Asian church adult ministries. This book recommends solutions towards the retention of Canadian-born Chinese adults in Chinese bicultural churches through empowerment. To address retention, the key factors that contribute to a silent exodus are established through qualitative research with participants of diverse church affiliations. Todd examines various models and proposed solutions the Chinese church has used to retain its English-speaking congregants, and gives attention to a theological basis for being inclusive in mission initiatives and for empowerment through passing the leadership baton. Todd makes some recommendations on the new wave of an emerging congregational model that requires negotiation with Chinese church leadership to give power away to English ministry leaders and congregations. He anticipates that this will permit transformational leadership practices that contribute to shalom, community transformation, and lasting congregations.

Representation Stuart Hall 1997-04-08 This broad-ranging text offers a comprehensive outline of how visual images, language and discourse work as 'systems of representation'. Individual chapters explore: representation as a signifying practice in a rich diversity of social contexts and institutional sites; the use of photography in the construction of national identity and culture; other cultures in ethnographic museums; fantasies of the racialized 'Other' in popular media, film and image; the construction of masculine identities in discourses of consumer culture and advertising; and the gendering of narratives in television soap operas.
