Ride the Revolution Suze Clemitson 2015-10-22 When Marie Marvingt decided to ride the 1908 Tour de France she was told 'absolument, non!' by M. Degranges and the Societe du Tour de France. Instead she rode each stage 15 minutes after the official race had departed and finished all 4,488 kms of the parcours - a feat that only 36 of the 110 men who entered the race could equal. Her motto? "I decided to do everything better, always and forever." It's in the spirit of Breakneck Marie that this book has been written. This is not an anthology of women writing about women's cycling. Nor is it an anthology of women writing about men's bottoms in lycra, or peloton crushes or the curse of helmet hair. This is an book that celebrates the diversity of women's writing about the glorious, sometimes murky, often bizarre and frequently hilarious world of cycling in all its soapy operatic glory - from the professional sport to the club run, on the roadside and in the saddle, behind the scenes and on the massage table. Ride the Revolution represents the best new writing on cycling from women involved in the sport at all levels – as fans, key personnel, riders, photographers, journalists and presenters. These fresh and vibrant voices examine the sport from a new perspective to provide insights that rarely make it into the mainstream - what is it like to be a top women rider or work in their support team? Where is the women's sport heading and when will more women be represented at the highest level of sport's governance? And how do you get out and ride your bike when the news is full of stories of cyclists dying and you can't get clothing that fits?

Notes on a Case of Melancholia, or: A Little Death Nicholas Gurewitch 2020-03-31 Death arrives in this darkly humorous and brilliantly illustrated tale created by Nicholas Gurewitch, author of The Perry Bible Fellowship Almanack! Death becomes a patient of a recently-bereaved psychoanalyst. The topic of discussion? His frolicsome child, who has no apparent interest in grim-reaping! Featuring an unfathomable number of lines which have been hand-chiseled into inked clay, this labor of love by Nicholas Gurewitch invokes the morbid humor of his comic strip (The Perry Bible Fellowship) and the spooky silent-film qualities of the late Edward Gorey.

I Will Survive Gloria Gaynor 2014-03-11 I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

The DARPA Urban Challenge Martin Buehler 2009-11-26 By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, healthcare, manufacturing, and assistance. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.

*Lords of the Fly* Monte Burke 2020-12-11 From the bestselling author of *Saban*, *4th and Goal*, and *Sowbelly* comes the thrilling, untold story of the quest for the world record tarpon on a fly rod—a tale that reveals as much about Man as it does about the fish. In the late 1970s and early 1980s, something unique happened in the quiet little town on the west coast of Florida known as Homosassa. The best fly anglers in the world—Lefty Kreh, Stu Apte, Ted Williams, Tom Evans, Billy Pate and others—all gathered together to chase the same Holy Grail: The world record for the world's most glamorous and sought-after fly rod species, the tarpon. The anglers would meet each morning for breakfast. They would compete out on the water during the day, eat dinner together at night, socialize and party. Some harder than others. The world record fell nearly every year. But records weren't the only things that were broken. Hooks, lines, rods, reels, hearts and marriages didn't survive, either. The egos involved made the atmosphere electric. The difficulty of the quest made it legitimate. The drugs and romantic entanglements that were swept in with the tide would finally make it all veer out of control. It was a confluence of people and place that had never happened before in the world of fishing and will never happen again. It was a collision of the top anglers and the top species of fish which would lead to smashed lives for nearly all involved, man and fish alike. In *Lords of the Fly*, Burke, an obsessed tarpon fly angler himself, delves into this incredible moment. He examines the growing popularity of the tarpon, an amazing fish has been around for 50 million years, can live to 80 years old and can grow to 300 pounds in weight. It is a massive, leaping, bullet train of a fish. When hooked in shallow water, it produces "immediate unreality," as the late poet and tarpon obsessive, Richard Brautigan, once described it. Burke also chronicles the heartbreaking destruction that exists as a result—brought on by greed, environmental degradation and the shenanigans of a notorious Miami gangster—and how all of it has shaped our contemporary fishery. Filled with larger-than-life characters and vivid prose, *Lords of the Fly* is not only a must read for anglers of all stripes, but also for those interested in the desperate yearning of the human condition.

*The Sopranos Sessions* Matt Zoller Seitz 2019-01-08 *New York Times*—Bestseller: "The authors' interviews with Chase are endlessly illuminating . . . the definitive celebration of a show that made history." —*Kirkus Reviews* On January 10, 1999, a mobster walked into a psychiatrist's office and changed TV history. By shattering preconceptions about the kinds of stories the medium should tell, *The Sopranos* launched our current age of prestige television, paving the way for such giants as *Mad Men*, *The Wire*, *Breaking Bad*, and *Game of Thrones*. As TV critics for Tony Soprano's hometown paper, *New Jersey's The Star-Ledger*, Alan Sepinwall and Matt Zoller Seitz were among the first to write about the series before it became a cultural phenomenon. Now they have reunited to produce *The Sopranos Sessions*, a collection of recaps, conversations, and critical essays covering every episode. Featuring a series of new long-form interviews with series creator David Chase, as well as selections from the authors' archival writing on the series, *The Sopranos Sessions* explores the show's artistry, themes, and legacy, examining its portrayal of Italian Americans, its graphic depictions of violence, and its deep connections to other cinematic and television classics. "Includes highly detailed recaps of each episode [and] a debate about the much-discussed final

moment of the final episode.” —The New York Times “Excellent . . . an enjoyable read.” —The Irish Times

Sous Vide Hugh Acheson 2019-10-15 Just as Hugh Acheson brought a chef's mind to the slow cooker in The Chef and the Slow Cooker, so he brings a home cook's perspective to sous vide, with 90 recipes that demystify the technology for readers and unlock all of its potential. **NAMED ONE OF FALL'S BEST COOKBOOKS BY FOOD & WINE** Whether he's working with fire and a pan, your grandpa's slow cooker, or a cutting-edge sous vide setup, Hugh Acheson wants to make your cooking life easier, more fun, and more delicious. And while cooking sous vide—a method where food is sealed in plastic bags or glass jars, then cooked in a precise, temperature-controlled water bath—used to be for chefs in high-end restaurants, Hugh is here to help home cooks bring this rather friendly piece of technology into their kitchens. The beauty of sous vide is its ease and consistency—it can cook a steak medium-rare, or a piece of fish to tender, just-doneness every single time . . . and hold it there until you're ready to eat, whether dinner is in ten minutes or eight hours away. But to unlock the method's creative secrets, Hugh shows you how to get the best sear on that steak after it comes out of the bath, demonstrates which dishes play best with extra-long, extra-slow cooking, and opens up the whole world of vegetables to a technology most known for cooking meat and fish. Praise for Sous Vide “High-end cooking comes to the home kitchen in this fun, clear approach to a gourmet technique. . . . [Hugh] Acheson writes with such charm that he can make warm water interesting.”—Publishers Weekly

The Man Who Knew Sebastian Mallaby 2016-10-20 **WINNER OF THE 2016 FT & MCKINSEY BUSINESS BOOK OF THE YEAR AWARD**, this is the biography of one of the titans of financial history over the last fifty years. Born in 1926, Alan Greenspan was raised in Manhattan by a single mother and immigrant grandparents during the Great Depression but by quiet force of intellect, rose to become a global financial 'maestro'. Appointed by Ronald Reagan to Chairman of the Federal Reserve, a post he held for eighteen years, he presided over an unprecedented period of stability and low inflation, was revered by economists, adored by investors and consulted by leaders from Beijing to Frankfurt. Both data-hound and eligible society bachelor, Greenspan was a man of contradictions. His great success was to prove the very idea he, an advocate of the Gold standard, doubted: that the discretionary judgements of a money-printing central bank could stabilise an economy. He resigned in 2006, having overseen tumultuous changes in the world's most powerful economy. Yet when the great crash happened only two years later many blamed him, even though he had warned early on of irrational exuberance in the market place. Sebastian Mallaby brilliantly shows the subtlety and complexity of Alan Greenspan's legacy. Full of beautifully rendered high-octane political infighting, hard hitting dialogue and stories, The Man Who Knew is superbly researched, enormously gripping and the story of the making of modern finance.

Mind of a Survivor Megan Hine 2017-05-18 \*\*\*Shortlisted for the Great Outdoors Book of the Year\*\*\* Surviving in the wild takes a great deal of strength. Often faced with frozen tundra, sweltering deserts, humid jungles, perilous mountains and fast-flowing rivers, Megan Hine is no stranger to perilous conditions. Whilst leading expeditions and bushcraft survival courses and in her work on television shows such as Bear Gryll's Mission Survive and Running Wild, she has explored the corners of the globe in pursuit of adventure. In these situations, the human brain is simultaneously the greatest asset and biggest liability. Not everyone is suited to the great outdoors and when danger calls many aren't as well-equipped to survive, no amount of top of the range kit will save you if you don't have the right frame of mind. Here Megan Hine examines the human ability and instinct for survival, showing us how others have developed the attitudes and attributes to thrive in the most dangerous situations, and how those same attitudes and attributes help them confront problems and obstacles at work and at home. Being chased through the jungle by armed opium farm guards, abseiling past bears and lighting fires with tampons, Megan has seen and done it all. In Mind of a Survivor she takes you along for a series of life-and-death adventures and shows you what happens to people when they are pushed to their limits. Inspirational rather than instructional, Megan examines the human ability and instinct for survival sharing the life tools that she uses and showing how they can as easily be applied to more domestic everyday life - from careers to relationships, from overcoming adversity to decision making. Filled with her own experiences, Mind of a Survivor is packed full of adventure and can help people survive in

It's about supporting her while she shores up her mind-body-spirit alignment so she can best handle the cosmic kick in the uterus and juicy kiss on the soul that pregnancy is. Makers and Takers Rana Foroohar 2016-05-17 Is Wall Street bad for Main Street America? "A well-told exploration of why our current economy is leaving too many behind." —The New York Times In looking at the forces that shaped the 2016 presidential election, one thing is clear: much of the population believes that our economic system is rigged to enrich the privileged elites at the expense of hard-working Americans. This is a belief held equally on both sides of political spectrum, and it seems only to be

gaining momentum. A key reason, says Financial Times columnist Rana Foroohar, is the fact that Wall Street is no longer supporting Main Street businesses that create the jobs for the middle and working class. She draws on in-depth reporting and interviews at the highest rungs of business and government to show how the “financialization of America”—the phenomenon by which finance and its way of thinking have come to dominate every corner of business—is threatening the American Dream. Now updated with new material explaining how our corrupted financial system propelled Donald Trump to power, *Makers and Takers* explores the confluence of forces that has led American businesses to favor balance-sheet engineering over the actual kind, greed over growth, and short-term profits over putting people to work. From the cozy relationship between Wall Street and Washington, to a tax code designed to benefit wealthy individuals and corporations, to forty years of bad policy decisions, she shows why so many Americans have lost trust in the system, and why it matters urgently to us all. Through colorful stories of both “Takers,” those stifling job creation while lining their own pockets, and “Makers,” businesses serving the real economy, Foroohar shows how we can reverse these trends for a better path forward.
